Foreword

Learning slang is most certainly one of the most useful and entertaining ways to explore a new language. To some people, the French have only two expletives: Merde (= shit) and Sacrebleu (= My God).

This e-Book will not only teach you how the French curse, but also allows you to discover some useful expressions that we use in France. Do not worry; I won't only focus on offensive words! You will learn tons of expressions and idioms that the French use every day.

Some portions of the e-book might contain some shocking expressions, but I have placed them at the end of the e-book, so if you would feel uncomfortable learning them, there are still tons on 'U rated' expressions. I tried to sort the chapter by priority for you to learn without being bothered by offensive words.

Because understanding and pronouncing the words is everything, I have included the MP3 in 2 versions:

- French only to let you practice the pronunciation.
- A French/English version which can be used as a quiz or to learn without the e-book in front of you.

Your feedback is very important to me, so if you find this e-book helpful to you in any way, please share a review and I'd be glad to give you a little gift as a sign of gratitude.

Contents

BY TALK IN FRENCH

FOREWORDS

Improving French Vocabulary was designed for French Learners who are serious about learning French. Its purpose is to enrich the vocabulary of both advanced beginners and experienced students of French.

I created this book because I wanted to provide learners with the most comprehensive French vocabulary reference available anywhere on Earth (yep, ambitious I know!) This book has more than 20,000 words divided into 50 categories: all the vocabulary every French learner will ever need.

With this e-book, you won't only learn all the relevant vocabulary for exams, but also the essential vocabulary needed to speak and understand everyday communication in French.

I have sorted out the topics in a clear and logical order so you will know what to focus on first:

Topics 1- 18: Focus and spend the most time on it.

Topics 19- 28 : Pay attention to this if you want to reach the next level of fluency.

Topics 29- 50: Focus only on the vocabulary that is relevant to you.

Topic 47 (main verbs): Important, but since you will need to master conjugation as well, pick the ones you find most useful for you

Enjoy this e-book and be sure to let me know if there's any way it could be improved; I will be happy to consider it. You can contact me at contact@talkinfrench.com. I'd love to hear from you.

Merci, thank you.

Frédéric BIBARD
